TODAY'S ACTIVITIES (as time allows)

- Are YOU Managing your Time Wisely??
  - Show this [video](#) (geared towards college students, but still valuable)
  - Have you ever *really* thought about how you spend your time?
  - This activity sheet will show you how you actually spend your time on an average day.
    - Remember, a day starts at midnight, and ends just before the next midnight. Your day should add up to 24 hours.

Work with your class to complete the questions on how they spend their time. Students will receive an email with the template that will enable them to make their own copy to fill out with their information.
